

SDI NIGHT/LIMITED VISIBILITY DIVER

Many divers find that night diving is their favourite type of diving. As with all specialty diving applications, procedures are different than those associated with open water diving. The purpose of this course is to acquaint the open water diver with the procedures, techniques, and potential hazards associated with diving at night, or in limited visibility. Becoming familiar with the use of dive lights, and night diving techniques such as navigation, buddy system procedures, communications, buoyancy control, and interacting with nocturnal aquatic life, the diver can safely enjoy night diving.

Who this course is for:

- Individuals that wish to explore the underwater world at night, along with the nocturnal wildlife

Course prerequisites:

- SDI Open Water Scuba Diver, SDI Junior Open Water Scuba Diver, or equivalent
- Minimum age 18 , 10 with parental consent
