

BALI SAFARI 2019

REEF CPR COURSE A dive trip with a difference and a mission!

9 days, 8 Nights Ex Kuta, Bali

Unlimited diving & snorkelling

Minimum Certification Level:

All levels incl. Snorkelers

Price: only \$1597 excluding flights

May 18th to 26th, 2019

September 21st to 29th, 2019

***Your mission, should you choose to
accept it, is to join us and help
rebuild an important nearshore
reef!***

Dive2U Mobile Adventures and Sustainable Oceans International (SOI) are proud to present a brand-new international diving and snorkelling experience with a major positive difference. Do more on your dive trip than just indulge and watch fish, actually help rebuild homes for your fishy friends and leave a lasting legacy for the locals.

In essence you are going to have fun while learning how to minimise your 'fingerprint' and leave the reefs better than you found them.

[Welcome to the future of sustainable dive travel](#)

More info: dive@dive2u.com | +61 409 411 299

During your safari you will receive expert instruction and official recognition of completion of Sustainable Oceans International's Reef CPR program. This is a unique program, designed for the non-scientist, and based on SOI's experience of rescuing corals and building artificial reefs since the 1980's.

Learn the 3 levels of Reef CPR action that every responsible diver should know so that you can reduce your 'fingerprint', rescue broken corals and help restore reefs wherever you dive.

You will learn the secrets of how to design an effective artificial reef, rejuvenate tired smashed reefs, and have the unique opportunity to literally construct your own special concrete artificial reef units.

The best part is next! You will get to deploy your reef units and have the thrill of watching fish immediately move in. There is nothing quite as rewarding and heart warming than watching fish (and even octopus, crabs, lobsters) enjoy the home you've built.

You will learn the 3 golden rules for successful artificial reef construction and two key reef planning tools that are not taught anywhere else.

You'll come home with real techniques that you can apply 'on the go' during future dives wherever you are. Learn to save corals wherever you go and forever leave it better than you found it.

"You can definitely teach an old dog like me new tricks! I've been diving for over twenty years and thought cleaning up was the only way I could help a reef..but after doing the Reef CPR course with Sustainable Oceans International, I have learned that there are so many ways I can help..even while fun-diving!" Jacqui Younger, Australia.

It's not all work! Location, Location, Location! With the accommodation literally on the beach in quiet north Bali there is plenty of time for some good ol' R'n'R. Enjoy all meals outside, sunbake to your hearts content and order your Bintang by the crate! Nights are enjoyed in a group social atmosphere with local volunteers joining in and singing local songs.

Unlimited fun diving! We'll be diving a lot during the course but the local reefs adjacent to the restoration site are pristine and are worth multiple visits. You will find all the wonderful marine life you would expect to see on tropical reefs right on

your doorstep, literally, including coral bommies over 1000 years old. Enjoy unlimited morning or afternoon dives during your safari.

"I spent two amazing weeks with a bunch of legends from Sustainable Oceans International and Dive2U. During that time I learned so much about natural reefs, the basics around artificial reef design, build and proper positioning, how to speedup reef recovery after disaster (natural or caused by human activities), coral relocation and farming. Now when i come across a broken coral i know there is so much more i can do. Is there anything better than doing what you love and at the same time giving back to the Ocean." Mihail Galabov, Australia.

What's included?

Accommodation, Meals & Transfers

- Return transfers from Kuta, Bali
- 8 nights shared accommodation in beachside location
- Transfers for included activities
- All meals from pick up to drop off (vegan friendly)

Diving & Activities

- Volunteer fees to Nth Bali Reef Conservation
- Tank & lead rental in Bali
- Min. 8 dives during course program
- Unlimited fun diving before or after course days
- Batu Caves Tour
- Swimming at Tirta Gangaa water palace
- Extras available include diving on an offshore FAD (Fish Aggregation Device - blue water dive), sunset cruises on local fishing boat, cooking course with in house chef and more (additional fees apply)

Reef CPR Course

- Theory, instruction, practical application and deployment, completion certificate and t-shirt
- All construction materials required for reef construction
- Any additional gear for deployment activities

Trip Flexibility

- By organising your own flights you get to choose when your holiday starts or ends. We'll provide pick up and drop off from Kuta for our dates, if you want to stay on and extend your holiday then no sweat!

OK, so what's not included?

- Airfares or associated taxes, fees, visas (take advantage of discounted fares with your preferred carrier and not 'get what you're given'.
- Want to stay longer? Extend your trip without hassle or fees - they're your flights!
- Gear rentals (except for tank and lead). Organise any gear rentals with us prior to departure to ensure gear quality and reliability during trip. Rentals in Bali are available if required.

- Alcohol is not included but readily flowing after activities ;)

Trip Itinerary

Each trip is different!

Here is a 'loose' itinerary that will confirm major movements:

Day 1

- 2pm Dept from Kuta
- Swim & lunch at Tirta Gangaa water palace
- Check in, introductions, site tour
- Commence Reef CPR Course

Day 2-8

- Reef CPR Course
- Construction, deployment, survey and maintenance dives
- Unlimited fun dives - including night dives (bring a torch!)
- Batu Caves Tour
- Wonderful local food prepped and cooked onsite (vegan friendly)

Day 9

- 12pm Dept to Kuta

Safari Specific T&C's
